

COMMUNITY FIRST

Dedication Event for the Sterling Community Solar + Energy Storage Project

Tuesday, April 17, 2018 • 2:00pm

The Sterling Municipal Light Department and Origis Energy USA cordially invite you to the **Community Solar + Storage Project Dedication Ceremony** on Tuesday, April 17, 2018 at 2:00pm at 15-23 Chocksett Road, Sterling, MA.

This project is the first community solar plus energy storage in Massachusetts. The system combines a 1 MW_{AC} rooftop solar installation with a 1 MW / 2 MW hours energy storage system to deliver dispatchable clean energy to our residential ratepayers. It will give our residential customers an opportunity to participate in our new Community Solar Program. This program will allow the participants to receive up to 25% of solar kwhr's based on their total bill at a rate that will be protected for 25 years.

I hope you will be able join us at our **Community Solar + Storage Project Dedication Ceremony** on **April 17th**.

Please feel free to contact me in advance if you would like to discuss the **SMLD Community Solar Program** in further detail.

Sincerely,
Sean Hamilton
General Manager
